Hubleto Apps

20+ free community apps.
Easy customization.
Fast learning curve.

Install using `composer create-project`.

Initialize dev environment with `php hubleto init`.

Create your app with `php hubleto app create`.

**Community
version will
always be
free.**

Certification

The screenshot shows the hubleto developer's guide website. At the top, there is a navigation bar with the hbl logo, the word "hubleto", and "business application hub". Below this is a "Developer's guide" section. On the left, a sidebar menu includes "Welcome", "Getting started", "CLI agent", "Apps", "Documentation", "Source code", "Tutorials", and "Certification". The "Certification" menu item is highlighted with a blue background. Under "Certification", there are three sub-options: "Level 1", "Level 2", and "Level 3". To the right of the sidebar, the main content area has a header "Certification" and a sub-header "Become a certified Hubleto developer". Below this is a section titled "Level 1" with a green icon. A text block explains that Level 1 ensures basic knowledge of the development process, architecture, and common software design patterns. It also lists what a graduated student will learn, such as preparing the environment and deploying to a customer's server. A blue button at the bottom of this section says "Start level 1 certification". At the very bottom of the page, there is a photograph of hands working on a laptop keyboard.

Developer / Consultant / Reseller
